DESIGN INSPIRATION

Touché is a plain fabric offered in earth tone colors, made of the fiber TENCEL. TENCEL has earned the name of the fiber of the future. Made from natural cellulose found in eucalyptus pulp, it is completely biodegradable and hypoallergenic because it prevents the formation of bacteria. TENCEL fiber has not only the ability to absorb humidity, but also to filter different elements such as bacteria, dust mites, and other polluting agents. All this shows how TENCEL significantly improves health, comfort and promotes the feeling of well-being. On top of these wonderful qualities, TENCEL is durable and machine washable similarly to cotton.
