DESIGN INSPIRATION

Sonnen-Pause, an outdoor fabric, which uses highly technical properties and combines them with comfort and beauty. By working special color pigments into the fiber, an extremely high light fastness is generated in the fabrics, and there is almost no fading (as it is the case with conventional fabrics) even with intensive exposure to UV rays. In addition, the materials are weather resistant and remain mould-free even after lengthy exposure to a wet environment. This reversible outdoor fabric Sonnen-Pause, produced in Italy, could be used for decorating by the pool, on the terrace, out in the garden or indoors.
