DESIGN INSPIRATION

Futuristic elegance animates this transparent, flame-retardant Trevira CS fabric, which offers many possibilities, especially for use in public spaces. With a floor-to-ceiling drop and a pattern repeat over 140 cm, it is ideal for resolving architecturally demanding situations. To produce ACHAT, the four differently colored yarns entwined on the jacquard loom disappear into a fascinating color gradation (known as a dégradé) before re-emerging. The Airo finishing refinement process, a mechanical treatment that does not use chemicals, enhances the three-dimensionality of the distinctive stripe design. ACHAT is manufactured exclusively for Christian Fischbacher by a family-run operation based in Italy.
